

Extrutech Partition Wall Panels

Providing the design options your projects demand.

The Extrutech P224 Wall Panel is a rigid 2-1/4" thick by 24" wide smooth wall panel with a bright-white, glossy surface on both sides. This panel is waterproof, will never rust, rot, corrode, or fade. The panel is easy to clean and ideal for high moisture areas where daily sanitation is critical.

The P224 Partition Wall Panel allows numerous design options. Giving you a wall thickness of 2-1/4" which allows for an insulation option that provides a (R-10). Cut to the inch panel lengths or based on your requirements, with door and window cut-out options. This user friendly panel also allows for easy field cuts if needed and its tongue and groove edge design makes for quick installation.

Extrutech Partition Wall Panel system (item# P224) is 24" wide by 2-1/4" thick, weighs 4lbs/ft., tongue and groove design, and is cut to the inch. The panel has an exterior wall thickness of .110", a multi-chamber interior running the length of the tongue & groove panel. Made of 100% virgin, exterior-grade PVC that will not support mold or mildew per ASTM D3273 and D3274.
