

Established 1992

# EXTRUTECH PLASTICS, INC.

*“Custom Extruder of Close Tolerance Profiles”*

*ISO 9001:2008 Certified for Quality  
USDA & CFIA Accepted*

*Class A Rated for Smoke & Flame By US & Canadian Standards*

## **MAINTENANCE & CLEANING RECOMMENDATIONS**

We recommend the following maintenance and cleaning program to keep your panels looking great. **Read and follow all manufacturer use and safety instructions.** Never use abrasive cleaners, chemicals, or brushes on your panels, and it is always a good idea to test a cleaner on a small area of panel. A few things to consider when discussing which cleaners to use with cleaner suppliers are the environment your panels are in (carwash, residential, or agricultural), your type of water (soft or hard), types of grease in your carwash bay, and soil type for your area (clay, etc.). Do not use cleaners that are solvent based (anything distilled) or contain a caustic acid.

**Maintain** – When properly maintained, our rigid PVC maintains its original profile and gloss. Use a soft brush or damp cotton cloth to wipe down the panels as needed. Your panels may be wiped down using off-the-shelf lime and soap scum removal products.

**Clean** – For cleaning our panels, we recommend a mild detergent with a soft cloth, such as Formula 409® or other multi-purpose cleaner, cleaners listed below or soap scum removers also work very well. You may use washer set at less than 3000 PSI, not more than 120°F, using a fan spray nozzle, keeping it at least 6” away from the panels surface, and moving the nozzle in a constant motion.

**Recommended Cleaners** – Follow manufacturer directions carefully!
