EXTRUTECH
Aqua-Tank Panel System
Using EXTRUTECHFORM®
Wall Panel System

This durable, long lasting system is designed for ease of sanitation and maintenance. Panels are a full two feet wide, cut to required lengths and snap together for quick installation. The Extrutech Aqua-Tanks offer a non-porous, prefinished, bright white surface on both sides, reducing finishing and installation time while providing an easy to clean, sanitary, solid structure.

Advantages:
• Quick installation, never needs paint
• Perfect where corrosion can be a problem
• Two foot wide panels - fewer seams
• Custom cut panel kits to 12 feet high
• Snaps together for quick installation
• Double spline, E-locking system
• Use standard rebar reinforcing methods
• Water proof - corrosion proof
• Panels will not rust, rot, or flake
• Resists mold, mildew, bacteria growth
• Low V.O.C. panels with honeycomb interior walls for maximum panel stability
• Protective film that is easy to peel off keeps panels clean during construction

Extrutech Aqua-Tanks are constructed using our “stay-in place” concrete FORM Panel System for poured walls. It is a quick set-up, pre-cut system, that provides a smooth, non-porous, easy-to-clean, pre-finished concrete wall in thickness of 6” and 12”. Tank sizes are available up to 12’ high and 60’ diameter. Ideal where sanitation is critical.

Benefits:
- Fifteen year warranty
- Strong - forms fill with concrete
- Sanitary - easy to clean
- Waterproof - no rot, rust or fade
- Smooth - non-porous surface
- Installs quickly and easily
- Industrial grade PVC
- Highly reflective
- Stain-resistant
- Low-maintenance - durable

Recommended Uses:
- Food Processing
- Dairy Facilities
- Cheese Plants
- Bottling Plants
- Aquaculture
- Swimming Pools
- Commercial Properties
- Waste Water Treatment Plants
- Water Tanks
- In-ground or above-ground

Extrutech Concrete FORM Panel Storage Tank
6” and 12” thick walls, 9’ high and 30’ diameter
Volume = 6,361.73 gallons

Extrutech 9’ high x 30’ diameter tank
