EXTRUTECH PLASTICS, INC. Announces Today That They Have Developed a New Suspended Ceiling Product That is CLASS A Rated

MANITOWOC, WI, FEBRUARY 5, 2009 – Extrutech Plastics, Inc. has begun production and sale of its new suspended ceiling product line. The system consists of a fiberglass grid support structure and the Extrutech P2400 – 24” wide plastic panel. This system can be configured with standard 24” wide panels, made up to 12’ long. The system is Class “A” rated for fire and smoke and the grid is seismic approved by ICC.

The Extrutech ceiling system offers a new construction / retrofit product that gives you the flexibility to construct ceilings faster, easier and safer. The components are water and corrosion proof and will not rot, rust, or flake. The system is USDA and Canadian accepted. Uses include Food Processing Plants, Clean Rooms, Laboratories, Restaurants, Cheese Plants and other facilities where cleanliness is of high importance. The product is highly reflective and comes with a 10 year warranty.

Extrutech specializes in corrosion proof, plastic wall and ceiling panels under the trade names “Easy Life” Panels and “Poly Board” Panels for Residential, Commercial and Agricultural construction. Extrutech also manufactures the plastic “All Weather Door”. The company is certified ISO 9001-2000 QMS compliant. Extrutech was founded in 1992.
