EXTRUTECH PLASTICS, INC. Introduces Green Statement

MANITOWOC, WI, NOVEMBER 17, 2010 – EXTRUTECH PLASTICS, Inc. has presented its Green Statement to the building industry.

Extrutech Plastics respects the environment. We encourage recycling and recognize the importance of a sustainable and economical building product. Our manufacturing plant reflects modern manufacturing standards and produces a quality, recyclable product for commercial and residential building needs.

Extrutech Plastics works with our customers in project design, ideas, and solutions. Our innovative wall and ceiling liner systems (including demountable walls, custom clean/isolation rooms, trim boards, door and door frames) are flexible for new construction, repurposing (adaptive reuse), and retrofit.

By incorporating our products into your project, you have little or no material waste. The materials are easy to maintain and clean without the use of harsh or caustic chemicals. Customer testimony states that the bright, white gloss of our panels visibly increases the lumens in their rooms and buildings.

You can achieve LEED credits now and in future building by incorporating versatile and adaptable Extrutech products in your building projects. Please contact your Extrutech sales representative for specific product information.

ABOUT EXTRUTECH PLASTICS, INC. - Located in Manitowoc, Wisconsin, USA, Extrutech Plastics manufactures its custom products in a 162,000 square foot state-of-the-art plant located on 10 acres; the company operates 21 extrusion lines 24 hours a day. It can produce shapes as small as ¼" wide and as large as 40" wide on its largest

production lines. Extrutech specializes in the extrusion of both multiple hollow, rigid plastic profiles and cellular foam, solid plastic profiles.

Extrutech Plastics was founded in 1992 by Greg Sheehy, and began extrusion with one used 3 ½” extruder and a downstream line. The first products were vinyl window profiles and tubing for central vacuum systems. The company has outgrown three smaller buildings and currently employs 45 associates on three shifts.

Extrutech Plastics is the industry leader in the production of high quality, close-tolerance, custom-manufactured plastic wall and ceiling panels, suspended ceiling panels, clean rooms, doors, door jambs, and interior residential plantation shutters. Extrutech services the car wash, agricultural, food processing, construction, office furniture, electrical and many other industries.

Extrutech Plastics, Inc. is ISO 9001-2008 QMS compliant. The scope of this registration encompasses the manufacture of custom plastic profile extrusions for the U.S. Government, agriculture, food, construction and other custom markets – domestic and international. We are also a qualified manufacturer for the “Buy American” requirements as set in the U.S. Stimulus Package requirements.

For additional information on Extrutech Plastics or its products and services, please contact us at 888-818-0118 or visit our website at www.epiplastics.com. We may also be contacted via email at info@epiplastics.com.
