EXTRUTECH PLASTICS, INC. Announces New Products, new web site and new certification for 2018.

Manitowoc, WI, April 12, 2018 – Extrutech Plastics, Inc. a leader in wall and ceiling panels, will be rolling out a new, patented EFS-P824-8” concrete wall form panel this year. This concrete form will be stronger and tougher than any of the competitor’s products, yet snap together easily to form a straight, flat wall; perfect for your new car wash. This 8” form can arrive to your jobsite pre-insulated and ready to receive cement, if required. This addition will further enhance our concrete wall form offerings which include our current EFS-P624- 6” concrete wall form. Since last year, we have added 5 new profiles to make corners and T- Wall intersections easier to assemble and load with rebar. The Extrutech P224 Wall Panel is made for interior partition walls and clean rooms; and the P645 Angle Form connector for the construction of concrete circular and oval storage tanks, curved concrete walls or above and below ground swimming pools, and water tanks of all shapes or sizes can be built.

These new products enhance the already large product offering of Extrutech Plastics for the various construction markets including the Food Processing, Dairy & Agricultural, Car & Truck Wash and Clean Room / Laboratory markets. Our stable of products include the 12”, 16” and 24” wall and ceiling panels, suspended ceiling panels, clean rooms, partition walls, doors, concrete forms, and

various new trims, cellular base trims and boards. The new trims include a bull nose outside corner, 6" base, 2x2 and 3x3 corners, and various other corner trims. The Extrutech panels are available in many colors including Red, Blue, Green, Yellow and now "Black" and "Woodgrain" colors for that "special" look for a spectacular visual effect, in your facility.

These Extrutech products offer superior sanitary surfaces for ease of cleaning and sanitizing on a daily basis. The panels offer a bright white, high gloss, easy-to-clean, non-porous surface that resists damage, corrosion and brightens any working area. These products are 100% waterproof and will not rust, rot, corrode, peel or discolor and are ideal for high moisture areas where daily sanitation is critical to the operation and health and safety inspectors.

For 26 years, since 1992, Extrutech Plastics has specialized in the manufacture of high quality, water proof building components in Manitowoc, Wisconsin. Extrutech has now also been upgraded as certified ISO 9001-2015 QMS manufacturer and a U.S. Government supplier. All products are made in the USA, by Americans, with only USA made materials. We now offer a full 20 year non-prorated liner panel limited warranty. Call us at 888-818-0118 or visit our new website for more information END
