

ExtruCrete™ Panel

Innovative building product from Extrutech Plastics, Inc.

ExtruCrete™ tilt-up panels create a superior sanitary surface that is designed for durability and cleanliness, combining the strength of concrete and the easy-to-clean finish of Extrutech Poly Board® panels. This creates a non-porous, prefinished, precast, structural panel that reduces the finishing and installation time of your construction project. The end result is a bright white, sanitary, easy-to-clean wall that will make everyone's day brighter.

Dairy Parlor with ExtruCrete Wall Panels

Recommended uses:

For any area that requires easy to clean concrete structural walls, such as:

- Dairy Barns
- Milking Parlors
- Car Washes
- Cheese Plants
- Food Processing
- Clean Rooms
- Bottling Plants
- Cold Storage
- Laboratories

Advantages:

- Available in a bright white, high gloss, hard surface
- For use in high moisture areas where corrosion may be a problem
- Low maintenance, easy to clean with high pressure washer
- Plastic will not delaminate
- Brightens the interior of any building
- Resists mold, mildew, bacteria growth
- Panels will not rust, rot, or flake
- Cleans easily – low maintenance
- Water-proof, corrosion-proof
- Termite-resistant
- Never needs paint
- Fewer seams
- ASTM-Class A Building Panel
- Reduces construction time and labor cost
- For tilt-up and precast construction
